

EUROLYZER ST_e

Flue gas analyzer

BlueLine[®]

SYSTRONIK

Messtechnologie

EUROLYZER STe is an ergonomically designed flue gas analyzer with a robust protective holster and integrated magnet. It is operated via a touch pad with a special recess for scrolling. A high-resolution TFT color display, the color-assisted menu design and color variable measured value representations guarantee high user friendliness. With automatic control devices at startup.

The measuring operation can be done in two active display levels. The all-rounder allowed the assembly with three measuring cells (O₂, CO, NO). Universal application for measuring small and medium-sized oil, gas and pellets fired heating systems according to the new 1st German Federal Immission Act (qA mean value measurement) and for CO concentration safety checks at gas fired systems. Thanks to its H₂-compensated CO measurement up to max. 9,999 ppm, it is suitable also for measurements on pellets fired.

Operation.....

The drop-down menu with colored symbols appears immediately after the activation of EUROLYZER STe. The touch wheel can be used to select the following different programs: Flue gas analysis, temperature measurement, pressure measurement, device settings and memory management. Confirm your selection by pressing Enter key.

When using the flue gas analysis function, you will first be prompted to select a fuel type from a list. Measured values are displayed on the screen.

Storage Options.....

A MicroSD card allows for system-independent storage. EUROLYZER STe offers a USB interface for communication with eg PC or Netbook optional data transfer via Bluetooth - for communication with pressure and temperature probes. Printer connection is via infrared.

Durable sensors.....

ECO sensors for oxygen are „lead-free“, durable, have a fast response time and this make an active contribution to environmental protection!

EN50379 part 1 and 2.....

The EN50379 is the European standard, in which the permissible measurement procedures are established to measure combustion Geräter. The EUROLYZER STe has certification EN50379 Parts 1 and 2 for measurements of O₂, COH₂, NO, temperature and pressure.

An extremely compact flue gas analyser

Technical specifications

O₂ (Oxygen)

| | |
|------------|-----------------|
| Range | 0 to 21.0 Vol.% |
| Accuracy | ± 0.2 Vol.% RDG |
| Resolution | 0.1 Vol.% |

CO (carbon monoxide) with H₂-compensation

| | |
|------------|---|
| Range | 0 to 4.000 ppm |
| Accuracy | ± 5 ppm (< 50 ppm) ± 5% RDG (> 50 ppm) |
| Resolution | 1 ppm |

CO₂ (carbon dioxide)

| | |
|------------|--|
| Range | 0 to CO ₂ max (depending on the fuel) |
| Accuracy | ± 0.2 Vol.% |
| Resolution | 0.1 Vol.% |

Flue gas temperature

| | |
|------------|---|
| Range | 0 to +1,000 °C |
| Accuracy | ± 1 °C (< +300 °C) ± 1 % RDG (> +300 °C) |
| Resolution | 1 °C |

Ambient air temperature

| | |
|------------|---|
| Range | -20 to +200 °C |
| Accuracy | ± 3 °C + 1 Digit (-20 to 0 °C) ± 1 °C + 1 Digit (0.1 to +200 °C) |
| Resolution | 0.1 °C |

Pressure

| | |
|------------|---|
| Range | ± 130 hPa |
| Accuracy | ± 2 Pa + 1 Digit (< 2.00 hPa) ± 1 % RDG (> 2.00 hPa) |
| Resolution | 0.01 hPa (< 19.9 hPa), 0.1hPa (>20 hPa) |

Options

NO

| | |
|------------|--------------------------------------|
| Range | 0 to 2,000 ppm |
| Accuracy | ± 5 ppm(<50 ppm) / ± 5% RDG (>50ppm) |
| Resolution | 1 ppm |

General specifications

| | |
|---------------------------|---|
| Dimensions (W x L x D) | 70 x 215 x 40 mm (inclusive protective holster) |
| Weight | approx.. 500 Gramm (inclusive protective holster) |
| Housing material | Polyamide (PA) |
| Display | Graphic colour screen 2,8" (240 x 320 Pixel) |
| Data communication | Infrared connection with the optional Euro Printer Bluetooth |
| Printer | external wireless thermal printer (EUROprinter) |
| Memory | MicroSD-Card (optional) |
| Operating temperature | 5 to +40 °C |
| Stock temperature | -20 to +50 °C |
| Ingress Protecting Rating | IP42 (EN 60529) |
| Battery | NiMH accu 4.8 V / 2,000 mAh |
| Mains Power Supply | Mini USB (5 V) |

Data processing app
Easily display and processing of the measured values by the Euro Soft mobile app for Android.

EuroSoft mobile

Optional accessoires

EUROprinter

The BlueLine EUROprinter is a practical thermal printer for wireless printing of measurement results from different BlueLine® devices. EUROprinter communicates via infrared wireless with the meter. EUROprinter is suitable for use with BLUELYZER ST, EUROLYZER ST(e), MULTILYZER STe/NG and S4600 ST series.

Scope of delivery: Battery,
1 roll printer paper and instructions.

Flue gas probe.....

This exhaust probe is connected to a adjustable measuring cone, a Thermocouple and a 1.8 meter long hose kit is fitted.

Gas conditioning with filter.....

Gas conditioning with filter to protect the instrument. It collects the condensate water and by the Filter element to be removed from the exhaust particles. The PTFE washer prevents ingress of condensate into the meter.

More accessoires.....

Get one for your needs
individual offer of instruments and accessories.

Modern measurement technology

Functions

Measurements of:

- O₂ (Oxygen)
- CO_{H₂} (H₂-compensated)
- NO (nitrogen dioxide)
- Differenz/Feinzug Druck
- T_{air} (Ambient temperature)
- T_{gas} (Flue gas temperature)

Calculation of:

- CO₂ (Carbon dioxide)
- CO undiluted
- Differential temperature
- Combustion efficiency
- Lambda (excess air)
- Flue-gas losses
- CO_{ref} (with O_{2ref} to configure)
- T_{au} (Dew point)
- NO_x (NO+NO₂)

Color display.....

The EUROLYZER STe has a 2.8" TFT color display with a resolution of 240 x 320 pixels. The various measurement menus are each represented in their own colors. The large viewing angle, clarity and ensure the backlight, that the data and measured values under all may be clearly visible.

Easy handling.....

Due to the clever design, everything is in one convenient and logical place. The EUROLYZER STe is very compact and therefore very easy to handle and transport. The high quality requirements of EUROLYZER STe are the same as in any other of BlueLine® measuring instruments!

SYSTRONIK
Messtechnologie

A complete measurement solution

SYSTRONIK

The SYSTRONIK GmbH specializes in the development and production of high quality measuring instruments for gas analysis, testing and maintenance of HVAC systems, and climate and environmental technology. All SYSTRONIK products meet the highest standards for quality, reliability and safety. Our equipment and our company is certified according to DIN ISO 9001. We are constantly striving to improve our quality, we ensure this through regular audits of unabhängigen experts.
